DETAILED ACTION

1. Claims 1-50 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to a method of obtaining a head of beef cattle comprising a genetic predisposition by assaying for the presence of genetic polymorphism linked to promoter P1 of exon 1A of bovine growth hormone receptor gene, classified in class 435, subclass 91.2.
- II. Claims 26-50, drawn to a method of breeding beef cattle that comprise a genetic predisposition of genetic polymorphism linked to promoter P1 of exon 1A of bovine growth hormone receptor gene, classified in class 800, subclass 21.

3. The inventions are distinct, each from the other because of the following reasons:

Although there are no provisions under the section for "Relationship of Inventions" in MPEP 806.05 for inventive groups that are directed to different methods, restriction is deemed to be proper because these methods constitute patentably distinct inventions for the following reasons:

In the instant case the different inventions, the methods of group I and II are patentably distinct because the steps of the methods are distinct. The method of group I is for genetic screening whereas the method of group II is for breeding. While the method of group II requires the screening step of group I, the step of breeding in group II is not required for practicing the method of group I. Therefore, the analysis and search of the invention of group II will require a distinct and separate search than that for the invention of group I. Furthermore, the inventions of groups I and II have been classified in separate classes and subclasses.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and their

recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

When amending claims, applicants are advised to submit a clean version of each amended claim (without underlining and bracketing) according to § 1.121(c). For instructions, Applicants are referred to <http://www.uspto.gov/web/offices/dcom/olia/aipa/index.htm>.

Applicants are also requested to submit a copy of all the pending/under consideration claims.
